8. Project Demonstration Phase

Objective

To demonstrate the completed standard laptop procurement automation and explain how the flow reduces manual processing.

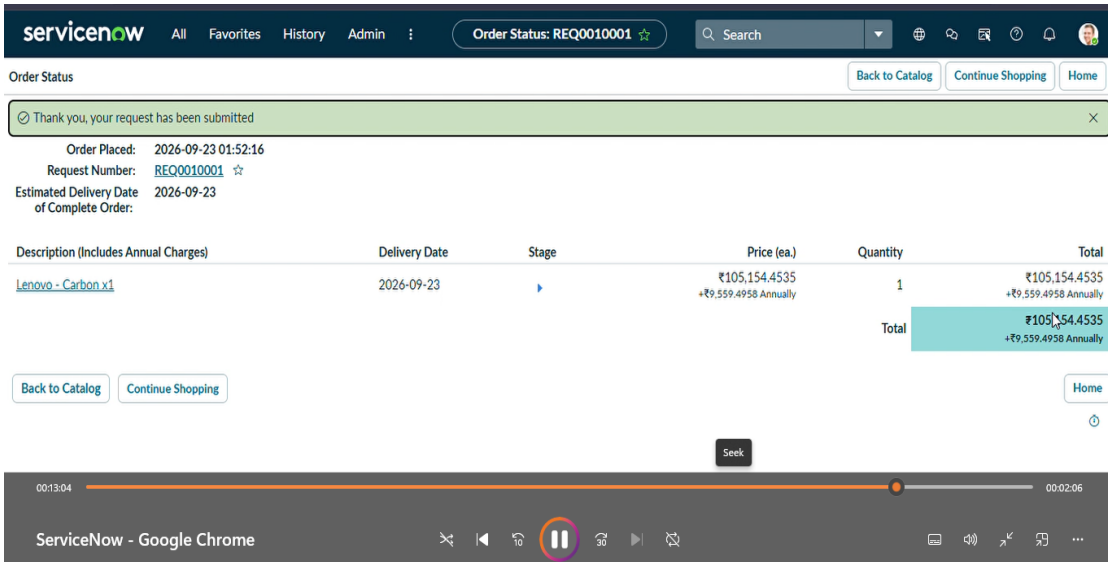

Activities Performed

- Introduce the project problem and objective.
- Explain the standard laptop request process.
- Show the configured Flow Designer flow.
- Demonstrate the trigger and condition.
- Show the approval process.
- Demonstrate the approved path and the resulting fulfilment/notification actions.
- Demonstrate the rejected path.
- Show the flow execution details and test evidence.
- Summarize the benefits and possible future enhancements.

Expected / Produced Output

The demonstration should show a complete end-to-end request lifecycle from submission to final outcome.
